Stallion Collection Initial Service

This initial service is required for stallions who are being considered for collection at Four Legged Farms. This provides our staff the opportunity to work with your stallion to assess his collection training needs, as well as to verify his semen count, motility, and what extender works best. For stallions who have never been collected on a phantom before, the goal is to train your stallion to approach, mount, and to be able to be collected off the phantom in a safe, calm manner, as well as to provide you with a report detailing his semen analysis and what extenders work best over 12, 24, 48, and 72 hours. We recommend your stallion undergo the sperm analysis once a year to make certain nothing has changed.

Many times it is necessary for us to bring in a trained teaser mare to assist your stallion in becoming familiar with the collection process. Should this be necessary, an additional fee applies...
